TURNTIME
TECHNOLOGIES

THE SLIDING CARPET™

Only **one** loader stacks cargo onto the Sliding Carpet. Then slides the carpet with the push of a button.

E190/195 E2 · B737 series
A320 family · A220

BENEFITS

- ▶ 10-20 min faster load/unload
- ▶ Protection of Cargo Holds
- ▶ Quick ROI: 12-18 Months
- ▶ No Crawling on Knees
- ▶ Reduced Manpower
- ▶ Increased Revenue

Reliable since
1986

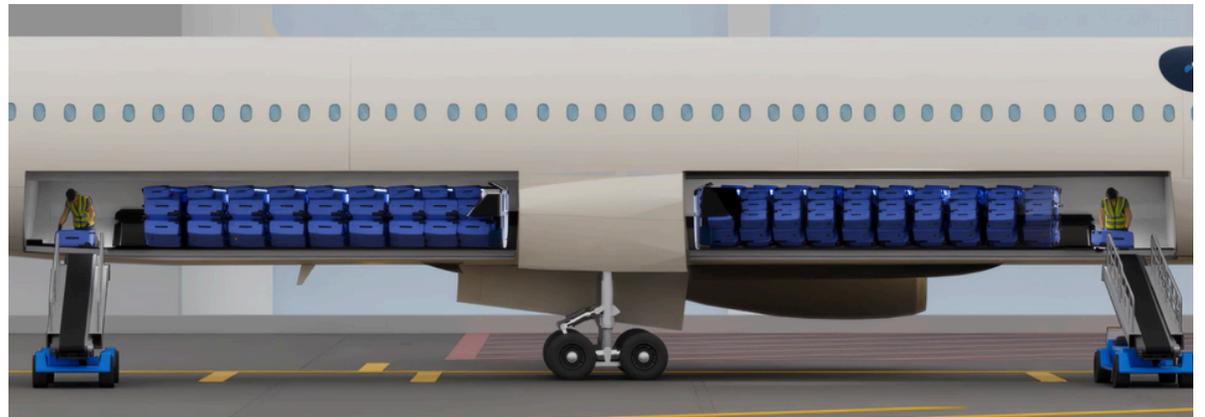

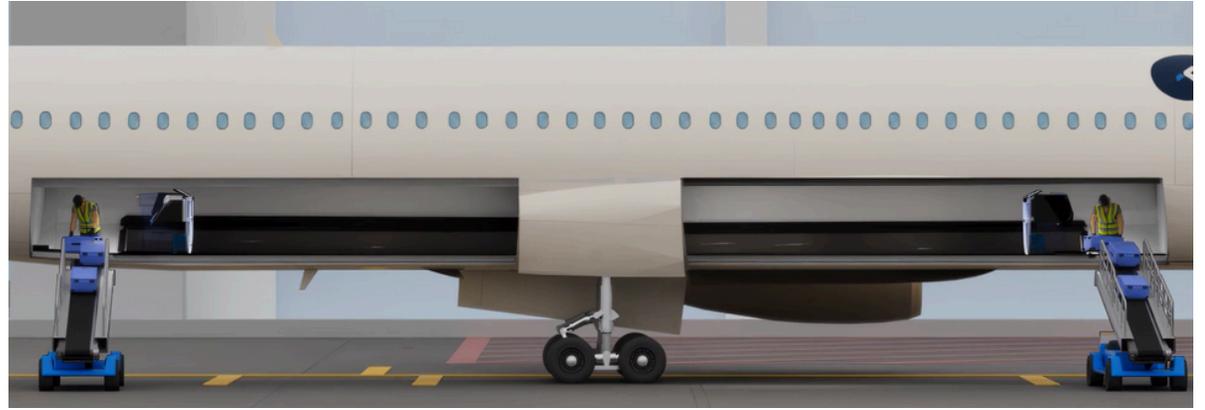

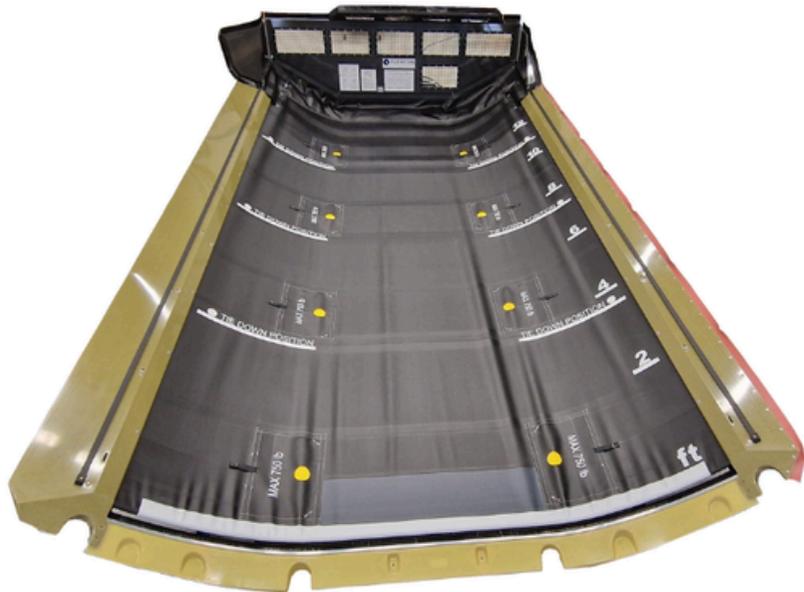

HOW IT WORKS

Step 1

Only one single onboard loader stacks bags and bulk cargo onto The Sliding Carpet.

Step 2

With the push of a button, the loader moves the belt to continue loading.

For unloading, the process is reversed.

BENEFITS

Reliable since
1986

Faster Turnarounds

Sliding Carpet cuts loading and unloading time by 10-20 minutes. It is faster than manual bulkloading and any other bulk loading aid.

- Better OTP on tight blocks.
- Saved time can be used for better OTP or even one extra flight per day.

Improved Ergonomics

Better posture and lower strain for loaders means less sick-leave and improved recruiting. Sick-leave and injuries that otherwise are very costly.

- Never have to crawl on knees the entire length of the a/c.
- Stay stationary, lower injury risk.

Protection of Cargo Holds

Sliding Carpet eliminates damage on aircraft floorpanels and walls and thereby reduces maintenance needed of the cargo hold.

- Less downtime for maintenance.
- Eliminates commonly needed and expensive maintenance.

Increased Revenue

Faster turnarounds enables previously inaccessible operations.

- Load Cargo in empty space, now there is time for that.
- New possible operation and cost savings lead to significant increase of revenue.

Reduced Manpower

Go from 2 loaders per cargo hold to 1. No matter the length of cargo hold.

- Long cargo holds require minimum 2 loaders, sometimes 3, even with other equipment.
- Sliding Carpet is the only system that only requires 1 loader, no matter the length of cargo hold.

Quick ROI: 12-18 Months

ROI of Sliding Carpet is typically 12-18 months.

- Possible due to significant cost-savings and increased revenue.
- With very few moving parts and reliability rate of 99.7%, the Sliding Carpet pays for itself without adding recurring costs like other systems.
